

Alex Rivera

Backend Engineer · alex@example.com · (555) 010-0000

Skills

Languages: Go, Python, SQL, Bash

Infrastructure: Kubernetes, Docker, AWS, Helm, GitHub Actions

Data: PostgreSQL, MySQL, RabbitMQ, Redis

Observability: Prometheus, Grafana

Education

B.S. Computer Science, Riverside State University, 2019

Summary

Backend engineer with 6 years building APIs and data pipelines, the last 3 in Go.

Experience

Backend Engineer — Parcelwise 2022-04 – present

- Built the shipment-tracking API in Go (gRPC and REST), serving 2,000 requests per second at p99 under 80 ms.
- Moved 12 services from VMs to Kubernetes on AWS (EKS) with Helm charts.
- Designed PostgreSQL schemas for tracking events and cut the slowest report query from 9 s to 400 ms with partial indexes.
- Added Prometheus metrics and Grafana dashboards for every service, and joined the on-call rotation.
- Reviewed code for two junior engineers.

Software Engineer — Brightcart 2019-06 – 2022-03

- Wrote order-processing services in Python (Django) and a RabbitMQ worker pool for payment events.
- Built a nightly pricing export with pandas used by the merchandising team.
- Maintained MySQL databases and their backup jobs.
